Syeda Marjan

AI Automation & Operations Specialist

marjansyeda0@gmail.com | LinkedIn | Website | Case Studies | GitHub | +92 344 8882888 | Islamabad, Pakistan (remote)

PROFESSIONAL SUMMARY

AI automation specialist who codes web apps and websites with Claude AI, then runs the operation on them for real clients. Built a job platform that stops 47% of bad listings before anyone applies and now runs a 3.8% client interview rate. Led a remote team through 10,132 applications and 88 interview requests, with 3 clients hired in under a month.

KEY RESULTS

- **3.8%** interview rate for a client (19 interviews from 500 applications), about 4x the 0.9% of manual applying.
- **47%** of job listings stopped automatically before anyone spent time applying to them.
- **1 month** from first application to job offer for a senior SEO client, using software I built.
- **3** clients hired in under a month at McKesson, CyberMaxx and Twilio while I ran the team's pipeline.
- **7** tools built and shipped with Claude AI and no dev team, each used on real client work.

CORE SKILLS

PROFESSIONAL EXPERIENCE

Founder, Operations & Automation | Robiq | Remote | 2026 to Present
Reverse recruiting business running remote job searches for clients in the USA, UK and UAE.

- Ran a senior SEO lead's job search on my own platform; he was hired by Somewhere within a month.
- Delivered 500 applications and 19 interviews (3.8%) for an affiliate client, shown in a client login.
- Coded the getrobiq.com website with Claude AI: 26 SEO pages, schema markup, client login, live demo.
- Built Client Outreach: finds emails, drafts each cold email and sends it from the client's inbox.
- Built Clipper, an AI tool that turns long videos into captioned vertical clips, for a client.

Operations Lead | Corda Digital | Remote | May 2026 to Sep 2026
Reverse recruiting agency running remote job searches for candidates.

- Built Corda Flow (RTA) with Claude AI: 4 team roles, 2,219 jobs and 771 AI-tailored documents.
- Added link checks that stopped 47% of dead, duplicate or wrong-country jobs before applying.
- Built Corda Scout, an AI job finder that sends only valid jobs from LinkedIn and Indeed into RTA.
- Administered the interview CRM: statuses, rescheduling and Google Calendar sync.
- Hired, trained and supervised a remote team; wrote SOPs, onboarding forms and a weekly pay model.

Business Development, promoted to Project Manager | CNT Consulting LLC | Remote | Jan 2026 to May 2026
Recruitment agency applying to jobs on behalf of candidates.

- Led a team that sent 10,132 applications from 3,103 sourced jobs, earning 88 interview requests.
- Personally sent 1,081 applications at a 1.2% interview rate, above the team's 0.9% average.
- As Project Manager, ran the team's daily work: reviewing applications and training new staff.
- Handled recruiter emails, follow-ups and interview scheduling for every client.
- Got 3 clients hired in under a month; every application and interview logged in Notion.

Virtual Assistant | US Client, Software Engineer | Remote | 2024 to 2026
Personal job search support for a US software engineer.

- Applied to jobs and handled his recruiter emails, follow-ups and interview scheduling.
- Logged every interview in Notion; the client was hired at Twilio.

Lead Generation & Prospecting Specialist | SFR Digital | Remote | 2024 to 2025
Digital agency providing research and outreach support to clients.

- Handled research, data entry and admin coordination across 50+ tasks per week.
- Set up tracking sheets that improved data accuracy and reporting consistency.

PROJECTS

- **RTA (Corda Flow):** job platform with AI agents that tailor each resume and cover letter.
- **Corda Scout:** AI job sourcing across nine ATS platforms, sending only valid jobs into RTA.
- **Client Outreach:** cold email software that finds emails, drafts and sends from the client's inbox.

- **Support Desk:** ticket board where AI reads every ticket and flags the risk.
- **Job Finder:** finds a LinkedIn job on the company's own careers board so clients apply direct.
- **Clipper:** cuts one long video into captioned vertical clips, with AI picking the best moments.
